## LATEST RESEARCH

1. As per the latest research by scientists, using modern imaging techniques such as MRI and Ultra sound, they have described osteoarthritis as Synovitis.
2. Synovitis is inflammation of synovium.
3. Synovium is a membrane that underlines the fiber capsule surrounding a joint, that forms a cavity around the joint.
4. The function of synovium is to secrete a fluid consisting of (a) Hyaluronic acid and (b) Lubricin
5. Hyaluronic acid is a GAG (Glycosaminoglycan, a substance that maintains the integrity of cartilages)
6. Lubricin is a glycoprotein
7. Both of the above act as lubricant and nutrients for the hyaline cartilages of the joint. They also provide shock proof cushion for the joint.

As per the Traditional aetiology - OA (osteoarthritis) is a disease of the cartilages. It is also known as 'wear and tear' disease. The latest and Current aetiology - Osteoarthritis is Synovitis, inflammation of synovial membrane.

## WHAT DAMAGE DOES THE INFLAMMATION OF SYNOVIUM CAUSE?

1. The inflammation of synovium affects its ability to secrete the synovial fluid, which hampers lubrication and nourishment of the cartilages.
2. Lack of lubrication creates friction between the cartilages and that causes wear and tear of the cartilages.
3. Also, the lack of nutrients for the cartilages causes damage to them.

**Synovitis** Condition

shutterstock.com · 1961724700

The image on the right shows in red colour the inflamed (swollen) synovial membrane. This is osteoarthritis.

## PAIN IN JOINTS

*Inflamed synovium causes pain in the joints and hinders movement.*

# QUESTION: WHY IS MOVEMENT NECESSARY FOR THE WHOLENESS OF CARTILAGES?

**ANSWER:** The hyaline cartilages do not have blood vessels. The nutrients from the synovial fluid are supplied to the cartilages by diffusion. Movement is essential for diffusion. Pain restricts movement which obstructs diffusion and nourishment of the cartilages and causes damage to them and the bones.

## SOLUTION

*A logical solution for OA is relief from pain and resumption of movements.*

## ARTHYT PACK (AP)

AP has been designed to reduce inflammation and pain with a combination of unique and natural ingredients that possess powerful anti-inflammatory properties. The principal ingredient of AP is Green-Lipped Mussel (GLM) extract, imported from New Zealand, where the mussels are cultivated under ultra-strict regulations of USFDA, EUROPEAN UNION, and NEW ZEALAND regulatory authorities.

GLM is rich in GAGs (Bio-active glucosamine), bio-active Chondroitin sulphate, Bio-active collagen, Vitamin A and E (anti-oxidants), Copper, Zinc and Selenium (Anti-oxidant properties).

GLM has a spectrum of five omega 3 fatty acids, all of which have powerful anti-inflammatory (anti-pain) properties.

To enhance the effectiveness of GLM, we have supplemented it with the extract of Boswellia and EPA & DHA rich fish oil gel caps.

# FEED-BACK FROM THE USERS OF ARTHYT PACK ( AP)

People who have used Arthyt Pack, have reported relief from pain in less than a month with no side effects. On the contrary, the customers have reported many additional benefits

## 4- STAGES OF OSTEOARTHRITIS

- Minor
- Mild
- Moderate
- Severe

It is easier to get relief if you arrest your arthritis on first two stages as it is easier. Also, in first two stages the damage to cartilages is minimal. In stage 3 and stage 4 the relief takes time.

## DOSAGE

- If your arthritis is less than 2 years old, you can take **one capsule from each of the two-bottle pack** with any of your meals.
- If your arthritis is more than 2 years old, your advised to take **1 capsule from each bottle** with breakfast or lunch and repeat the same dosage with your dinner.

## MONEY BACK GUARANTEE

*If in an unlikely case, you do not get relief in less than 2 months, you can send us back empty or unused products for a full refund.*

## HELP DESK:

*for any enquiries regarding the products or consultation please call on the following number **+91-7428705600** or send us your questions on the following link: **info@natconbiolife.com***

## AN EARNEST REQUEST

*Once you get relief form pain, we request you to give us a testimonial with your personal details and written permission to permit us to share it with others who may need help. We are enclosing a format for the testimonial.*
